

SUMMER INTERNS

Hi there! Airthings is a fast-growing technology company looking for summer interns to join our team! We will take on at least 10 paid summer interns in 2019. Interns can work from around mid June to mid August and are given at least a full week of vacation during that time.

We are...

A technology company creating radon and indoor air quality detectors for consumers and professionals.

Headquartered in the heart of Oslo, with offices in both Chicago and Quebec and customers in more than 50 different countries. As a summer intern you would work at our headquarter in Oslo. We have 30 employees and counting, including scientists, engineers, developers and visionaries.

Recently named one of the fastest growing companies in Europe by the Financial Times.

You are...

Intellectually curious and innovative

Eager to grow with a company

An excellent communicator and loves collaborating across teams

Interested in health, science and technology

Key Responsibilities

We are open to hearing about your interests and what you would like to learn more about

Possible Interests

Hardware

Embedded Computing

Apps

Cloud services

Marketing

Our mission

Airthings' mission is to ensure that people around the world take control of their indoor air quality through simple, affordable and accurate technology solutions, making radon and air quality detectors as common as smoke detectors.

Please send a little bit about yourself, your area of interest and a CV to hr@airthings.com. We will begin reviewing applicants at the beginning of the year. Looking forward to hearing from you!
