

Deepinsight – Interns 2019

We are looking for 2 aspiring data scientists or software engineers to join us as interns (payed) for 4-6 weeks in Oslo in 2019.

COMPANY DESCRIPTION

- Deepinsight is a start-up company with the ambition to build a leading data science institution
- We are currently 8 people and strive to create a company where nerds can be happy
- We apply machine learning to real world problems in partnerships with large Norwegian companies

WHAT WILL YOU DO?

- Work on a specific data science or data engineering problem. We find out what together. The task will be challenging and based on your interests and knowledge.
- Collaborate with one of our data scientists to give you guidance and discuss you work
- Write code
- Probably teach us something new

QUALIFICATIONS

- Nice to people around you
- Eager to learn
- Enjoy quantitative tasks and study for a technical degree (at minimum 3rd year)
- Coding skills
- Interest in machine learning and data science
- Experience building something with code (really anything!)

WHAT WILL YOU LEARN?

After the internship you will:

- Be better at coding
- Have experience with data science on real world problems
- Have exposure to common tools in the data science/software engineering toolbox (e.g., google cloud and git)
- Have a reference point for what else to learn to become a valuable data scientist or software engineer
- Learn how a small tech start-up works

HOW TO APPLY?

Please send the following to careers@deepinsight.io:

- CV and grade transcript
- Example of code you have written
- When you can do the internship (preferably summer 2019, but we are flexible)
