

## When:

25th - 27th  
March, 2026

## Where:

Jane Street  
London Office

# Apply to Jane Street's SEE programme!

Over the course of several days, a select group of university students will meet Jane Street employees and learn how math and computer science have a real-world impact on the work we do. Participants will also gain a detailed look at the many different roles within our firm.

Jane Street will cover all travel expenses to and from London as well as housing and a variety of social events.

If you have any questions, please email [work@janestreet.com](mailto:work@janestreet.com).

Learn more at  
[janestreet.com/see](https://janestreet.com/see).

Deadline to apply:  
11th January, 2026

*SEE has two different programme tracks students can apply for:*

## Trading & Research Programme:

Through short lectures, data-based activities, and mock trading sessions, students will explore mathematical and financial concepts, including probability, market structure, arbitrage, and machine learning applications.

## Software Engineering Programme:

Students will learn about the concepts, tools, and skills that we use in our everyday work through talks and hands-on activities. Working together with full-time SWEs, they'll build experience with programming fundamentals, software design principles, and development practices that are used throughout the industry.

*Jane Street is a global trading firm with offices in New York, London, Hong Kong, Singapore and Amsterdam. Our approach is rooted in technology and rigorous quantitative analysis, but our success is driven by our people.*
